

Personal presentation Ivan STOL

Born to Orthodox parents, Ivan was interested in spirituality and science from an early age. But he was never satisfied with the answers he found.

After two years of research, he found The Urantia Book in 1980 and, after reading it for 9 months (the time it took for a gestation period), he was born again, so he has been studying it ever since.

He joined the AFLLU in 2001, becoming successively Treasurer and Vice-Chairman; he has been Chairman since 2012.

Ivan is married with three children, two brothers and two sisters, all of whom are non-readers of The Urantia Book .

He helped with the accounts, printing the newspapers and the website.

It has organised several trade fairs, including one with a conference. He has a good ability to synthesise and see the big picture, and he can give advice. But he does not define himself as a leader.
